Plastic Portable Bollard With Base 56-1/2 In. Yellow / Black

MODEL BOL-PBB-P-56-Y

Protective Barriers / Portable Base Plastic Bollard

PRODUCT OVERVIEW

A plastic bollard with fillable base is a great alternative to traditional permanent bollards. The plastic units can be filled with a variety of substances for a more stable base or left empty for simple movement. If bollards are contacted the lightweight design minimizes damage to both parties involved, unlike steel bollards. If the bases are filled and are too heavy to be moved manually, there are built in fork pockets to ensure quick movement with a fork truck or fork lift.

KEY FEATURES

- Bright colors provide clear visibility and awareness
- Controls traffic or pedestrian flow
- Fillable base for strength in demanding areas
- Plastic tube design for easy movement
