Drum Handling Equipment / Drum Grippers

PRODUCT OVERVIEW

The drum grippers make it easy to pick up one or two open head (with lid installed and secured) and closed head steel drums without leaving the seat of the fork truck. Simply slip the forks into the fork tubes, fasten the safety restraint and the drum gripper is ready to go. The knuckle gripping system is lowered around the drum, gripped tightly, and then lifted into the air. Drum is automatically released by lowering the forks. All models feature hinged folding design for storage.
