# Factory Installed Set Programmable Height Adjustment 24 Volts For EHLT Models

**MODEL EHLT-PROGRAM**

Ergonomic Solutions / Programmable Height For Lift Tables

## PRODUCT OVERVIEW

The programmable height eliminates unnecessary bending and "land control jogging" by presetting the multiple working heights at the touch of a button. The hybrid technology linear sensor is used to control positions at any preset height. It's excellent for repeat repositioning applications with up to 4 programmable preset heights. It offers height adjustment for jogging lift at preset increments. The fully integrated controller has an LCD display with a 15-button keypad on the panel display including a raise/lower push-button.

## KEY FEATURES

- Programmable height eliminates unnecessary bending and "land control jogging"
- Hybrid technology linear sensor is used to control positions at any preset height
- Ideal for repeat repositioning applications with up to 4 programmable preset heights
- Controller has an LCD display with a 15-button keypad for optimal results
